

RTCA in Kansas

The Rivers, Trails and Conservation Assistance (RTCA) program is the community assistance arm of the National Park Service. The National Park Service (NPS) staff provide technical assistance to community groups, city, county, tribal governments, and non-profit organizations working to enhance close-to-home outdoor recreation and natural resource conservation opportunities. We help local leaders plan and design trails and parks; conserve and improve access to natural areas; protect special places; and create recreation opportunities.

The RTCA program in Kansas offers a wide range of services that can be tailored to meet the needs of an individual project. The NPS staff members are trained facilitators who encourage project leaders to build collaborative partnerships among governmental and non-governmental stakeholders. The program helps communities and groups define their vision, goals, and objectives; analyze issues and opportunities; and develop strategic action plans and time lines for projects. We do not provide financial assistance, but can help project partners identify and secure sources of funding and technical support.

Any community with committed project partners can apply for assistance. Believing the best plans are completed locally, the National Park Service will work with partners to encourage broad-based community participation in planning, designing, and implementing the projects we support.

In 2016, the National Park Service in Kansas will work on a variety of projects including:

- **Arkansas River Water Trail** – The project goal is to develop a world class water trail in the state of Kansas. In addition, to achieve National Water Trail System designation in 2016. (Location: Great Bend, Kansas)
- **Lee Mill Heights Park** – The Project Goal is to develop a master plan for a new natural area park in Manhattan, Kansas. (Location: Manhattan, Kansas)

A group enjoying the Lee Mill Heights Park.
